## TO WHOMSOEVER IT MAY CONCERN

This is with reference to Ms. Madhuri M, aged 25 years (Hosp.No. 817621), who is a known case of juvenile glaucoma with angle closure in both eyes, was on anti-glaucoma medications. Since her intraocular pressure was not getting under control with maximum medical therapy, she was advised trabeculectomy in both eyes. Subsequently she underwent left eye Trabeculectomy with Mitomycin C on 22.06.2023. Now we are planning right eye Trabeculectomy with Mitomycin C on 13.07.2023.
